ENiQ® Security Ecosystem solutions

99.9%
anti-microbial knobs

An all-round powerhouse without compromise

ENiQ® Pro

Reliable, strong, smart, versatile. Your ENiQ® Pro digital cylinders truly can do everything you want, without compromising any of its securing strengths, ease of use, for that matter! It's the perfect workhorse on which to build your Security Ecosystem.

The benefits

- **HIGHEST SECURITY CLASSIFICATIONS**
  Never worry! It'll take of anything you throw at it.
- **PLUG & PLAY**
  Installation is a breeze, as the cylinders are adjustable in length.
- **EASY BATTERY REPLACEMENT**
  Easy access to the batteries, so you'll never get locked out.*

- **VERSATILE**
  No matter how specific your security needs, your ENiQ® Pro cylinder is up to the task.
- **FULL BUILT-IN CONNECTIVITY**
  You'll never have to upgrade your cylinders.
- **HIGH DURABILITY**
  These cylinders are built to last!

- **MANY VARIATIONS**
  Perfectly designed to suit any situation.
- **SECURED FROM THE UNSEEN****
  It is possible to order the knob of the ENiQ® Pro with an anti-microbial nanosilver coating, scientifically proven to kill 99.9% of harmful bacteria, germs, fungi, even viruses.

*will last around three years with normal battery use.   **The actual anti-microbial coating is invisible. The blue coating in the image is for illustration and aesthetic purposes only.

turning even the most basic door into an integral part of your digital security ecosystem – easy but reliable, safe and of the highest quality.

Where to use

- ENiQ® Pro can be deployed anywhere,wherever traditional mechanicallocking systems do not meet your requirements.

- Offices and administrative buildings.
- Healthcare and nursing homes.
- Banks and hotels.
- Schools and universities.

- Shopping centres, restaurants, etcetera.

ENiQ® Security Ecosystem solutions

DIGITAL CYLINDERS

Great variety

There's a perfect ENiQ® Pro for everything.

The ENiQ® Pro is available in 12 variants, each designed for a specific purpose. Each is available in four profiles and is also adjustable in length. Long story short: there's a perfect ENiQ® Pro for everything.

High quality

- Splash water-resistant in conformity with protection class IP65.
- Fire resistant in conformity with protection class T90.
- Meets drilling and pulling protection guidelines according to SKG*** and VDS BZ certifications.

DOUBLE KNOB CYLINDER
The inner knob can always be operated. The external electronic reader is controlled by the transponder to provide access. Dimensions: from 30/30 mm.

DOUBLE-SIDED READING CYLINDER
Both the inner and outer knob are freely rotatable, so that identification via a transponder is necessary to open or close the door on either side. By assigning different access rights on the outside and inside, you can direct the flow of people through a building.

HALF CYLINDER
Suitable for key switches, gates, distribution boxes.
Dimensions: from 30 mm.

SHORT-LONG CYLINDER
For installation in a standard rebated door with a door thickness of 40 mm. Dimensions: from 27.5 / 30 mm.

DOUBLE-KNOB CYLINDER FOR GLASS DOORS
With the same functions as the standard double-knob cylinder, but specially tailored to glass doors. The robust stainless-steel design gives the stylish, transparent glass doors optical added value. Dimensions: from 27.5 / 10 mm.

CYLINDER WITHOUT INNER KNOB

PADLOCK

HALF CYLINDER FOR SWIVELING LEVER
With resilient carriage.
Suitable for servers and patch cabinets.

LEVER CYLINDER
Suitable for letterboxes, etc.
(only for indoors).

ENIQ EE
The Emergency Exit versions of ENiQ® are designed in accordance with DIN EN 179 and EN 1125 and are the ideal solution for escape and assistance routes. The cylinders have a unique feature which guarantees that the driver is always reset to the 6 o'clock position, so that the anti-panic function always works.

The ENiQ® EE is available in three varieties:

EE WITH INSIDE KNOB

EE WITHOUT INNERKNOB

EE WITH MECHANICAL INDOOR KEY

MIWE

PROGRAM YOUR ENIQ PRO CYLINDERS YOUR WAY

Your ENiQ® Pro Cylinders can be programmed any way you like: through online connectivity and PC software, by using the ENiQ® app, with transponders or key cards. Your cylinders are ready for any type of operation, now and in the future.
