RS Sigma  
A good investment  
has to pay off.

## Advantages

- High safety
- High convenience
- Key profile protected

we **dom**ore for security

# RS Sigma

A good investment  
has to pay off

The RS Sigma system is the brand locking system for customers who value a high level of safety but watch their costs at the same time. Whether in new or refurbished buildings – property or company secrets all need protection. And there can be quite a lot of doors involved in apartment blocks, condominiums and other building complexes. Designed as a master-keyed system, RS Sigma offers you the convenience you can expect from a modern master-keyed system. You need the security, we offer the matching solution.

Safe, fast and reliable.

Simple to extend using the clip tag and compatible with the electronic locking systems from DOM, RS Sigma is future-proof and thus protects your investment long-term!

## Advantages

### ■ HIGH SAFETY

Up to 19 locking authorisation queries per key make it almost impossible to overcome the cylinder. 6 solid pin tumblers and control pins at the side prevent unauthorised opening with copied keys.

### ■ KEY PROFILE PROTECTED

The key profile is protected by a registered trademark.

### ■ HIGH CONVENIENCE

The ergonomic shape of the key head makes it easy to handle.

### ■ VDS AZ APPROVAL (MODULAR)\*

Maximum possible protection against burglary and unlocking attempts (optional) recognised by an independent testing institute. Condition according to VdS standard.

## In detail

### 1 CUT LAYERS MATCHING THE PROFILE

Protection against key copies

### 2 COMPLEX CODING IN THE KEY

Makes it more difficult to copy

### 3 NEW SILVER KEY

Corrosion-free and low-wear

### 4 DOM BRAND PROFILE

Unlimited trademark protection

### 5 LOCKING NOSE

### 6 6 TUMBLERS MADE OF SPECIAL BRASS/HARDENED STEEL

Offer manipulation protection against intelligent opening methods and impact protection

### 7 CONTROL PINS

Checkpoints during the key authorisation query

### 8 SPRINGS

Part of the pin tumblers, they move the pins to the correct locking position
