

DOM ix TwinTec®

Leading roles in security

The benefits

- Anti-bumping and anti-picking pins
- High manipulation protection
- High key copy protection

DOM ix TwinTec®

Leading roles in security

The DOM ix TwinTec® is a great leap forward for home and business security. Featuring floating mounted dual roles, DOM Security's new reversible key system provides high protection against unauthorized key copying, while 11 active locking elements are tailored to individual locks – or as a master key system for small- or medium-sized businesses – offering the highest levels of security that keep you and your property safe, locked, and protected.

Locked on

Reversible, dual roles
– top-notch security

A reversible design and floating mounted dual roles make the DOM ix TwinTec® nearly impossible to replicate or pick, while modular cylinders provide extreme drilling and pull protection. Optional plastic key heads provide ergonomic – and comfortable – handling, with a flat key head offering compatibility with protective rosettes. Speaking of compatibility – the DOM ix TwinTec is ready to be paired with electronic locking systems with ClipTag. When it comes to security, you and your business deserve the best.

Benefits

- Floating mounted dual roles
- Compatible with electronic locking systems via ClipTag
- Plastic key head for ergonomic handling
- Extended key neck length for better fit with security fittings
- Flat key head – compatible with protective rosettes
- Modular cylinders for the highest level of drilling and pull protection
- Rated DIN EN 1303 – the highest Attack Resistance rating
- Property rights – patent term 2036

Certified and qualified

Secure yourself with top marks

You wouldn't guess by the looks of it, but your DOM ix products are filled to the brim with innovative technology, patents and intelligent security. All adding up to security that can live up to your expectations and requirements. If there's one thing these accolades can tell you, it's that you can rest assured you've made the right decision.

HALF CYLINDER

Half cylinder offers key access from one side only.
Range of application: Technical doors, central entrance,
Switching cylinder for lift controller.

- Adjustable cam in 8 settings
- Available with 360° freewheel functions (333FRLH).
- Available in different lengths and the flexible modular technology.
- Available with gearwheel cam 10 and 14.
- Can be incorporated into all DOM Masterkey systems.
- Optional: seawater-resistant version.

DOUBLE CYLINDER

A double cylinder offers key access from both sides.
Range of application: Front doors, cellar doors, apartment doors, etc.

- Available with 360° freewheel functions (333FRL).
- If required also lockable if the key is inserted from one side (333T).
- Can be incorporated into all DOM Masterkey systems.
- Optional: seawater-resistant version.

MODULAR HALF CYLINDER

A modular half cylinder offers key access from one side only, with a modular design that allows a longer individual outer dimension.
Range of application: Technical doors, central entrance,
Switching cylinder for lift controller.

- Extended key is matched to all common security fittings with anti-core pulling function
- Complex coding guarantees your own registered key

Variants for endless combinations

All you need to
perfectly secure your home

Each member of the DOM ix Family brings with it unique properties and features. Not every access point has the same security requirements – your front door is very different from a top floor window – which means your home or business requires a tailored solution.

The DOM ix Range provides just that. The DOM ix Family can be combined to create security perfectly suited to your home. It might be a bit of a cliché to say the possibilities are endless. But who cares about clichés when it's the truth?

MODULAR DOUBLE CYLINDER

A modular double cylinder offers key access from both sides, with a modular design that allows individual length dimensions and longer total length.

Range of application: Front doors, cellar doors, apartment doors, etc.

- Resistant to common burglary methods, such as knocking
- Better protection against violent “breaking” and cylinder “core pulling”
- Can be incorporated into all DOM Masterkey systems.
- Optional: seawater-resistant version.

2222 SWISS ROUND CYLINDER

Swiss round cylinder offers key access from both sides.

Range of application: Front doors, cellar doors, apartment doors, etc. specially for the Swiss market.

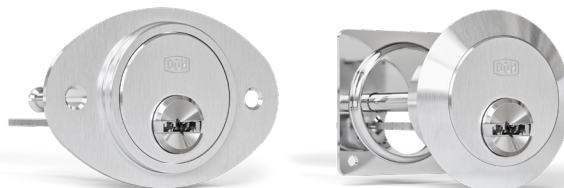

- If required also lockable if the key is inserted from one side (333T).
- Can be incorporated into all DOM Masterkey systems.
- Optional: seawater-resistant version.

DOUBLE CYLINDER WITH KNOB

A double cylinder with knob offers key access from one side and a knob option on the other side of the door.

- Can be incorporated into all DOM Masterkey systems.
- Doors with different security classes can be combined and opened with a single key

555 TAILPIECE CYLINDER

The outer cylinder for screw-in locks is for use in wooden and metal doors.

Range of application: box locks, additional locks, garage door locks.

- Version for wooden doors 555P
- Version for metal doors 555R

SWITCH LOCK 393

A switch lock is a special cylinder with solder contacts on the back.

Range of application: front door, apartment door, cellar door, letter box, or garage

- High manipulation protection with up to 19 locking authorisation queries per key
- Optional: Modular cylinders, highest level of drilling and pull protection

382 HEAVY CYLINDER CAM LOCK

Lever cylinders are used, for example, to lock steel doors. The attached lever is actuated by the closing process and functions as a bolt.

- Great for letter boxes, lockers, safes, boxes, wardrobe lockers, inspection flaps, vending machines, etc.

777G3 PADLOCK

Range of application: Grilles, doors, gates, cabinets, tool boxes, basement windows, sheds, switchgear, barriers, etc.

- Clear shackle height: 32 mm.
- Housing width: 56 mm.
- Classification according to EN 12320 Grade 3.
- Standard: forced locking.
- Optional: with self-locking.
- Can be delivered with clear shackle height 60 mm or 120 mm on request.
- Compatible with any Euro profile half cylinder.

777G5 HEAVY PADLOCK

Heavy-duty padlock for protection of larger valuables / objects or in the event of a high risk of theft.

Range of application: Grilles, doors, gates, cabinets, tool boxes, basement windows, sheds, switchgear, barriers, etc.

- A padlock with grade 5 security class according to EN 12320.
- Compatible with any Euro profile half cylinder.

The finishing touch

Customise colours and knobs.

All cylinders are available in various metal colour options through an electroplating dye process. They may be subtle, but coloured cylinders can truly alter the look of your doors, making every detail match your carefully designed interior style. Choosing your knob not only further complements this, and can also change the way you interact with your doors – as well as how they feel. It's perfect security with the perfect look and feel. What's not to like?
